About NovaBridge Biosciences
NovaBridge Biosciences ("NovaBridge") (NASDAQ: NBP) is a global biotechnology company focused on identifying, developing and maximizing the value of differentiated therapeutic assets. The Company advances programs through clinical development and pursues the financing and partnering strategies best suited to each opportunity.

NovaBridge's portfolio is led by givastomig, a Claudin 18.2 × 4-1BB bispecific antibody being developed for the potential treatment of gastrointestinal malignancies, and Visara, its majority-owned ophthalmology subsidiary. Through Visara, NovaBridge is building a diversified ophthalmology franchise designed to address unmet needs across diseases of the front and back of the eye.

NovaBridge's objective is to build a sustainable biotechnology company by repeatedly identifying differentiated innovation, advancing it efficiently, and bringing novel therapies to patients through the path best suited to each opportunity.
